

Religion: Cult of the Duck

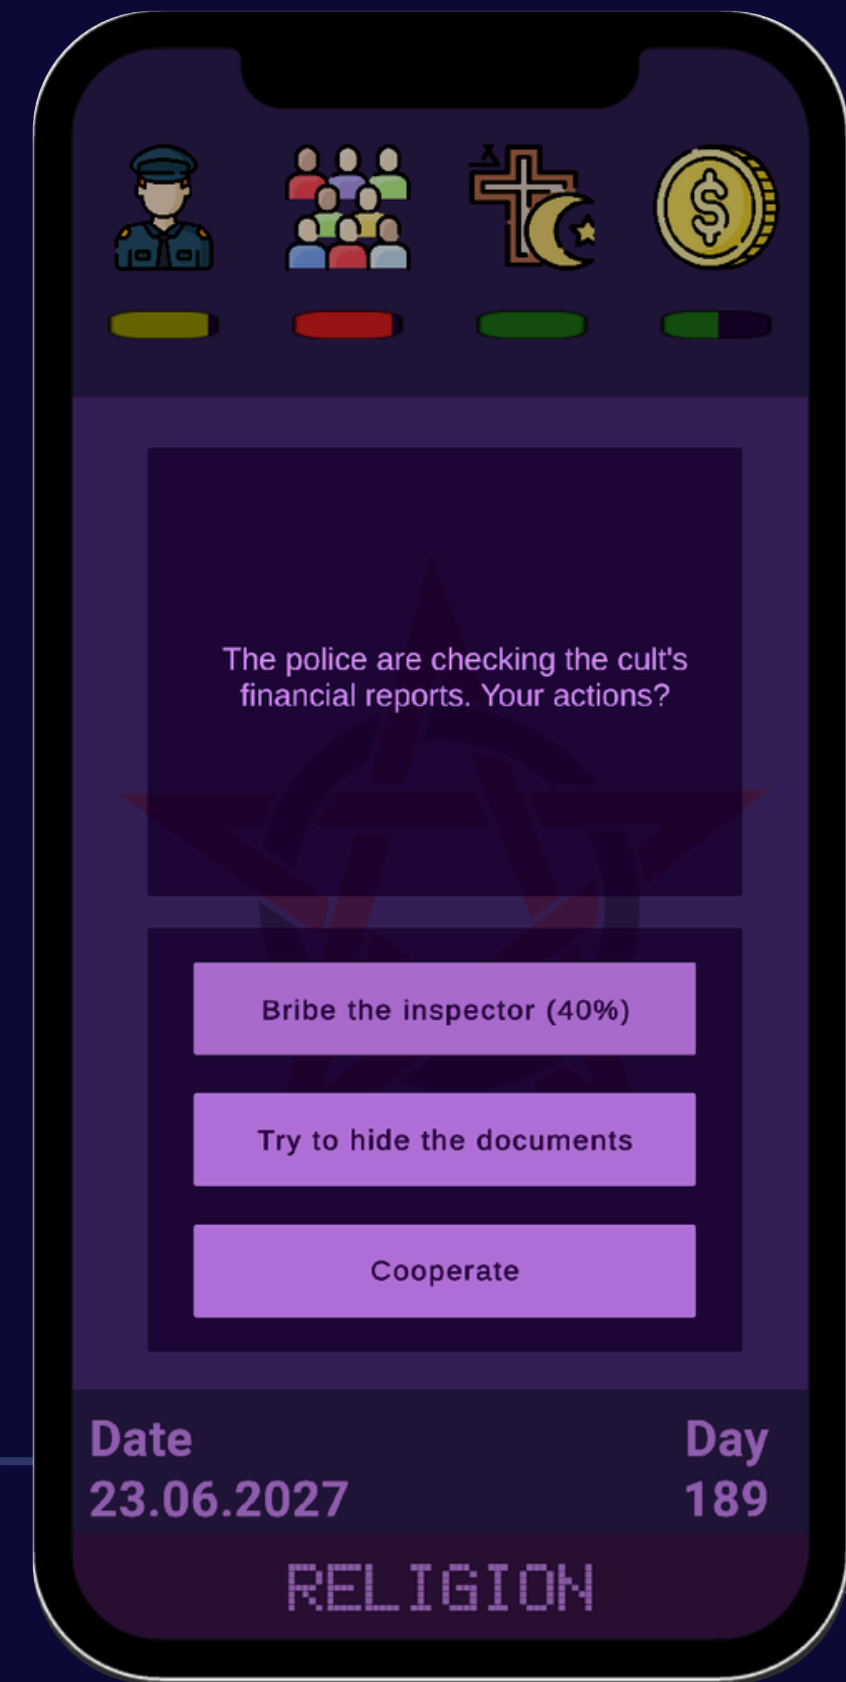

mobile narrative game

Powered by Unity2D

Game concept

In *Religion*, the player takes control of a strange cult.

Through decisions, rituals, and conversations with an unknown entity, the player gradually uncovers global conspiracies and hidden truths.

Gameplay

The game is based on random and story-driven events.

The player must make decisions that affect both resources and the course of the story.

Resources
Police Followers Faith Money

Gameplay

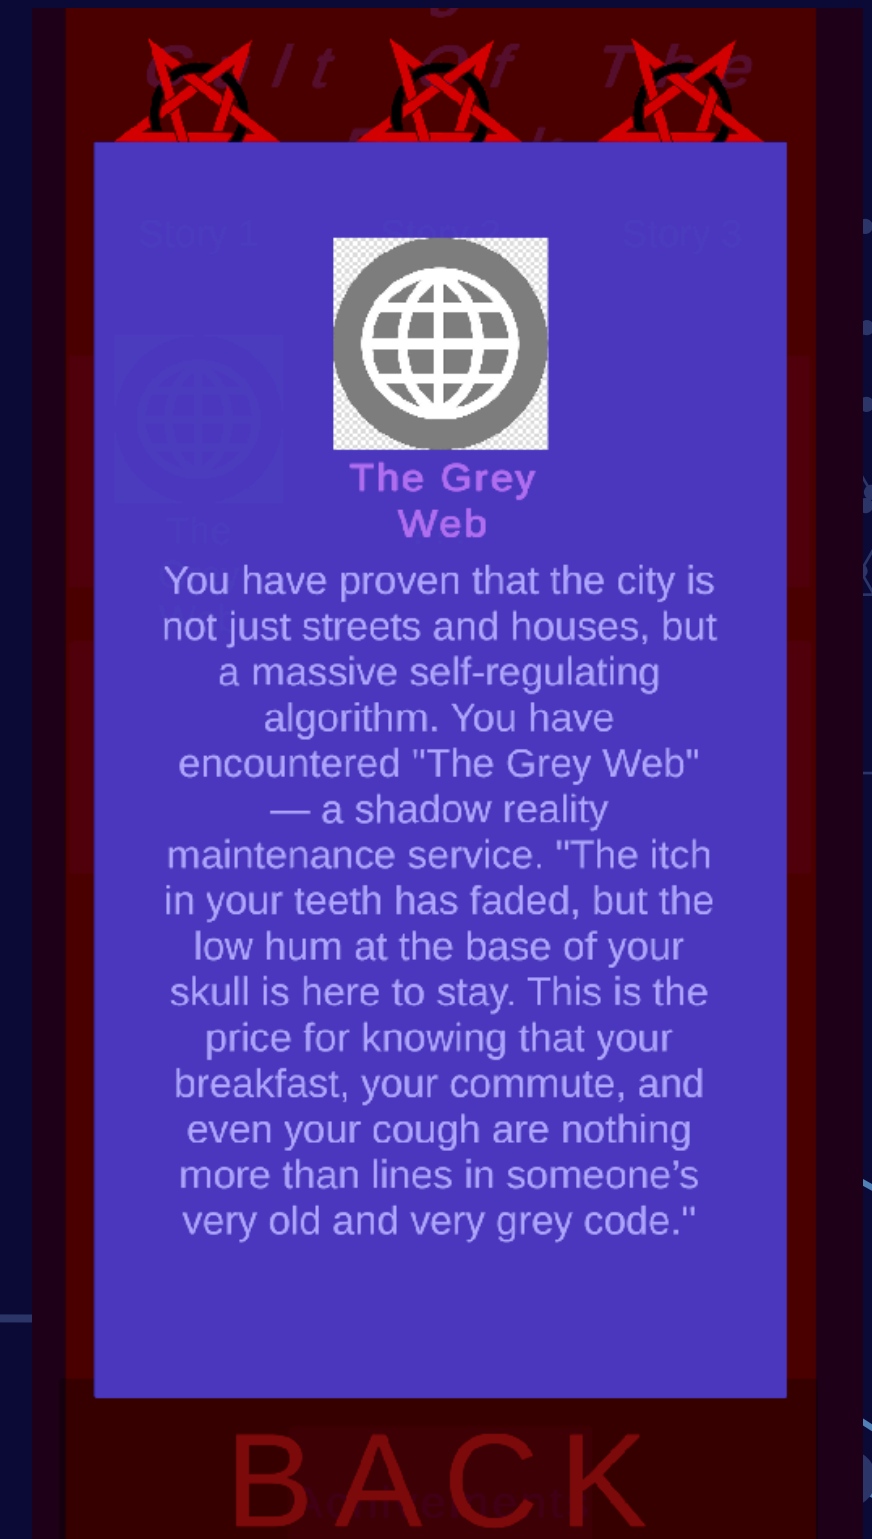

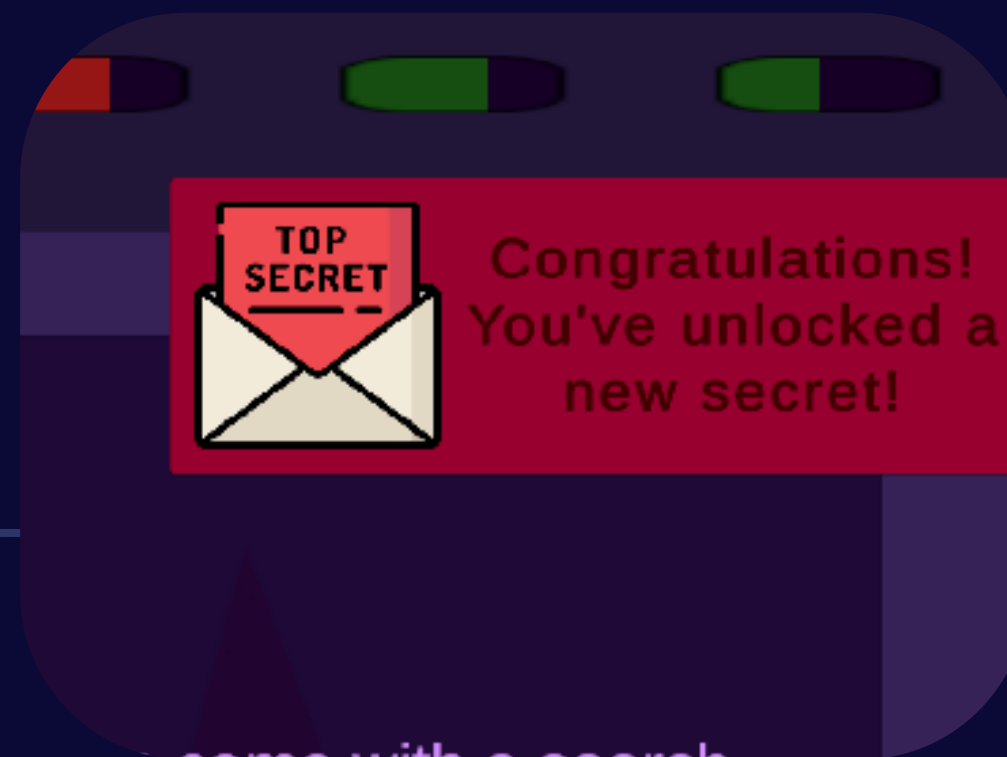

Every decision has consequences. Certain actions can unlock new storylines, while others can lead to trouble with the police or the loss of followers.

Throughout the game, the player regularly communicates with a mysterious deity who offers hints, asks questions, or manipulates the player.

Gameplay

The main goal of the game is to uncover all the secrets and global conspiracies.

Technical execution

The game was developed using the Unity engine and the C# programming language. The focus was on a modular and easily expandable architecture.

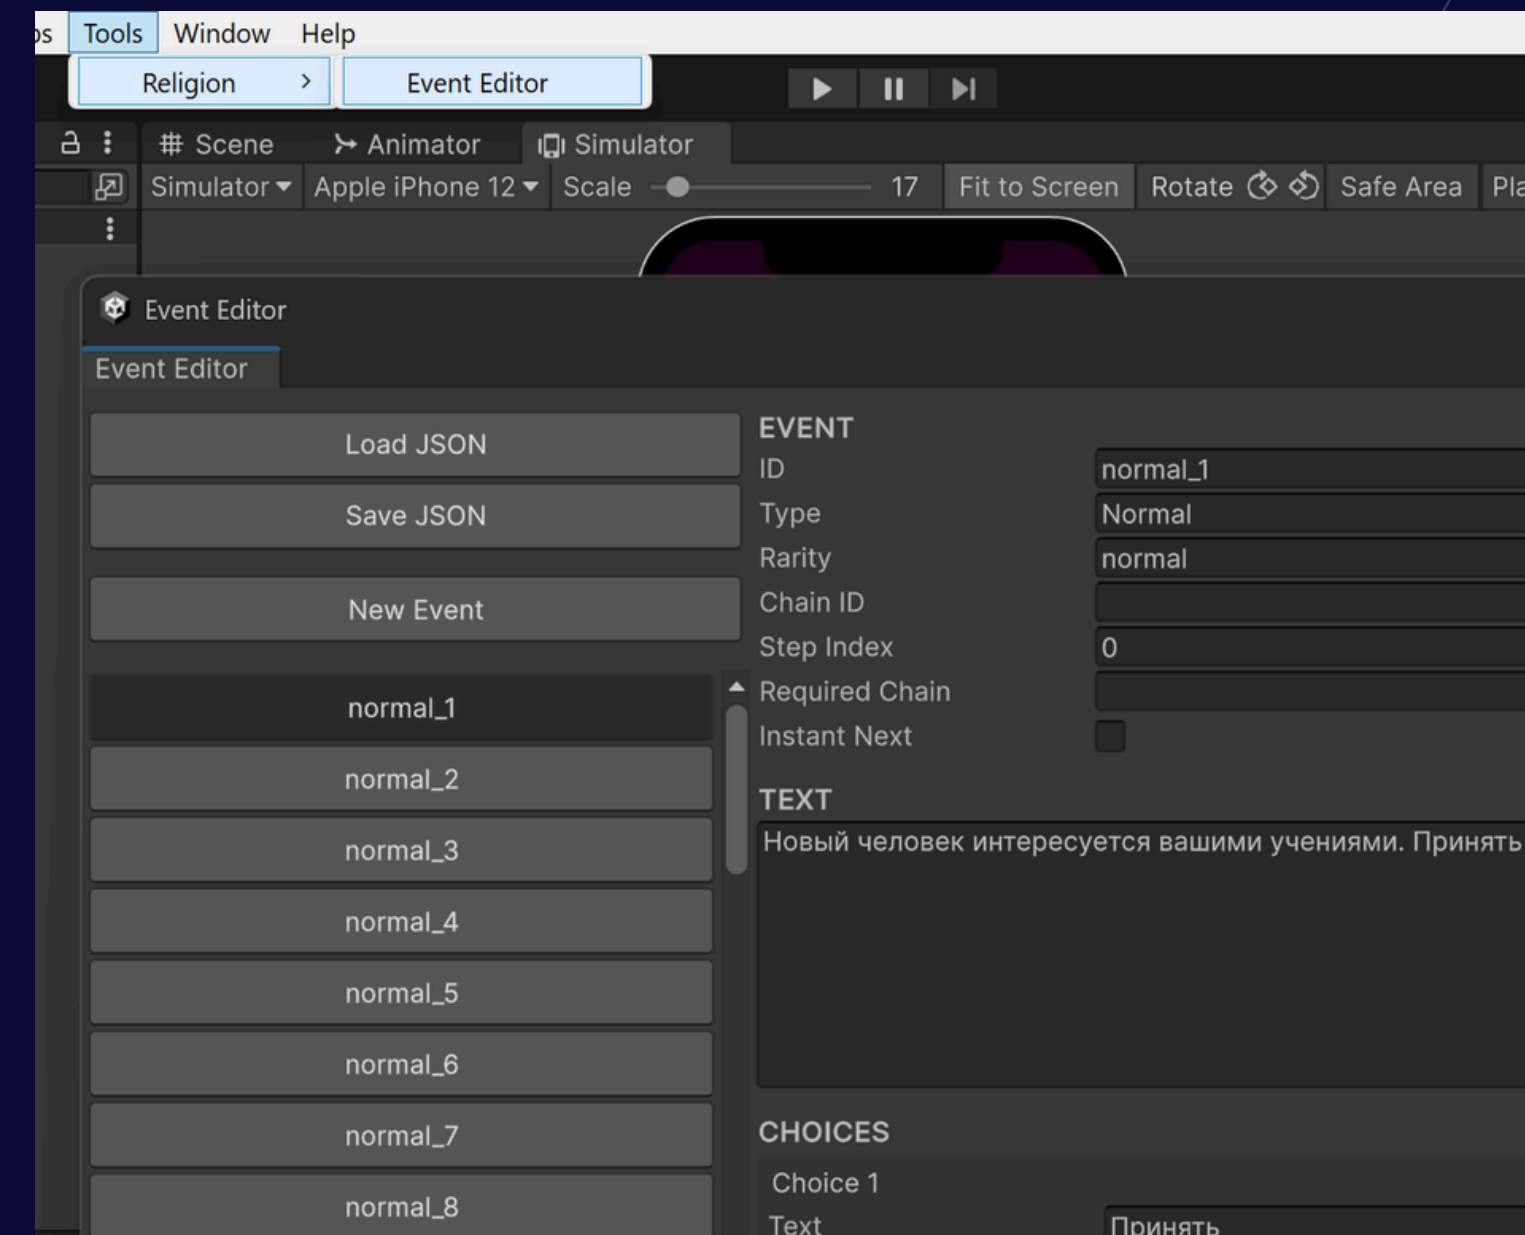

Systems Used

- JSON-based event system
- Dynamic story chains
- Save/load system
- Multilingual localization
- Resource and decision-making system
- UI system with dynamic events

Events data

Events, dialogs, and decisions are loaded externally via JSON files. There is a separate JSON file for each language.

In addition, a custom Unity tool was developed that allows new events and story content to be created quickly and easily.

Challenges

- Managing complex story chains
- Storage system using JSON
- Multilingual support
- Balancing game mechanics

Future plans

The project is still under active development.

Plans include new story content, improvements to the visual design, and a release on mobile platforms.

Planned Features

- Expanded storylines and new mysteries
- Improved UI/UX design
- Android and iOS release
- Integration of advertising for the mobile version

The background is a dark blue gradient. It features several decorative elements: a horizontal line with dots at each end near the top and bottom; abstract line patterns with dots in the corners; and a hexagonal grid pattern on the left and right sides.
